

Accessing Computer Security Configuration
Baseline Documents
September 27, 2006

How-to Steps

1. Must have a valid KCA certificate loaded in your web browser.
2. Visit the Computing Division Document Database: <http://cd-docdb.fnal.gov/>
3. Click on "Access Certificate Version of CD DocDB".
4. One of two things will happen:
 1. You will see a form that allows you to enter various search parameters. Go to step 5.
 2. You will see a form that asks for your email and what groups you want to belong to. Ask for membership in the "KCA" Group. When you receive email notice that you are in the group, start again at step 2.

How-to Steps (continued)

5. Under the heading "List:" select "Keywords".
6. Under the heading "CSPP" select the keyword "CSPP_Rewrite".
7. A list of configuration baselines will be displayed.
8. Click the title of a baseline.
9. Under the heading "Files in Document:" click on the document with the desired format (generally .doc or .pdf are the only choices).

Short Cut to Baselines

- Once you have established access to docdb as described above, baselines can be accessed:

<http://computing.fnal.gov/cd/CSPPdocs>

Document access parameters

- Read only access to all documents available to the KCA "Group".
- Able to use all of the DocDB search features.
- Convenience of not needing a username/password.
