

Authorization for Network Blocking

This letter authorizes Keith Chadwick to request Network Traffic Termination ('Network Blocks') of the FNAL Networking Group or FNAL Networking Group delegated process or tools without individual case approval by the FNAL Computer Security Board or Fermilab Computer Security Coordinator. Authorization to request 'Network Blocks' are limited to the following:

Site Network Close Block, Individual Machine
~~Site Network Close Block, Network CIDR~~
Site Network Border Block, Individual Machine
~~Site Network Border Block, Network CIDR~~
Internet Border Block, Individual Machine
~~Internet Border Block, Network CIDR~~
~~Internet Border Block, Port/Service~~

These 'Network Blocks' are to be requested only in the cases of incident response of compromised machine, approved policy or baseline scanning of vulnerable machine or immediate threat of increased risk to the FNAL GCE or FNAL OSE.

'Network Blocks' are to be requested via only approved mechanisms:

- Tissue event tracking system
- Notification to FNAL Networking Group with a corresponding Service Desk ticket

Any other 'Network Block' requests not defined within this authorization must be approved by the FNAL Computer Security Board and/or Fermilab Computer Security Coordinator.

The period of authorization is valid from 11/18/2011 to 11/18/2012

Authorizing Authority:  11/18/11
Computer Security Manager Date

Authorization Grantee:  7555N 1/6/2012
Signature Date
