

CDF offline : week of 2006-05-16

- end of the shutdown, collaboration keeps focus on the preparations for the summer conferences
- Recent events: sprint'06 IFC meeting
 - All the data processed
 - Large scale ntuple production: finishing
 - MC production 'theme of the week': FORTRAN and the GRID MC production and the GRID – optimized mode, database access
 - Transition to the GRID:
 - goal: 1 entry (submission) point per continent
 - Validating NAMCAF: North American CAF
 - Next step: merging SDSC and MIT
 - Data Handling: shooting for stability
 - Tapes: < 900 slots (DC consumption ~ 100/week)
 - Planning '06 procurements
