

OSG@CD Services Support

RuthPordes

OSG@CD - Services Supported

- DNS
- Maillists
- Communications and information web portal.
- OSG workshop and meeting support

Nameservers

- Opensciencegrid.org owned by Fermilab and supported by FNAL name services
- Aliases for other host names such as
 - www.opensciencegrid.org -> fermilab web server
- Currently lacking defined interface to OSG for support.

Maillists

- Xxx@opensciencegrid.org on Fermilab list serv.
- Some mail lists vectored to other sites at Indiana University e.g. incident-response-1
- Issues
 - Subscribing is only supported through listserv.fnal.gov. Can listserv.opensciencegrid.org be added?
- Currently lacking defined interface to OSG for support.

OSG Information Portal Support Center

- CD will register the Information Portal at www.opensciencegrid.org as an OSG service that we provide.
 - Starting to put in place aliases to other OSG sites as distributed operations put in place e.g.
<http://www.opensciencegrid.org/ops/>
- The mail list associated with this support is osg-webmaster@opensciencegrid.org
 - This mail list is staffed by Program Support
- OSG-Webmaster gets internal support for the components of the service:
 - CSS supports the Document database and Plone servers. Support comes through helpdesk@fnal.gov
 - Program support supports the web page and document database operations and content.

OSG Workshop and Meeting Support

- Program Support provides web pages and administrative support for collaboration and technical group meetings and workshops
- Interface is through osg-webmaster@opensciencegrid.org. This should change.
