

Run II Resource Project, Status Report, Jan 4-Feb 8, 2008.

Author: Rob Kutschke

Distribution: Rick Snider

CC: Qizhong Li, Mark Fischler, Amber Boehnlein, Patty McBride, Vicky White

This week I continued digesting the spreadsheets that specify the D0 model and the code that specifies the CDF model. I have started a write-up that describes these models. The hardest parts of the D0 model are now written up. A slightly out of date draft is in CD-doc-2604. The combined D0 and CDF version will be finished Wed Feb 13 give to take a day, at which time I will ask for feedback, seek out in updated input numbers and start to refine the model. I will also make an appointment to speak with Vicky to refine my understanding of what she wants from this project.

On Thursday I gave the first of the bi-weekly status presentations, CD-doc-2597. The purpose was to make sure that everyone had seen the charge the charge and the next few steps in the work plan with everyone and to get feedback. There was general feeling that I am broadly headed in the right direction but that they need more details to be sure. I learned about some more meetings that I should sit in on to see if they will provide me with useful information: Mike Diesburg's offline meeting and Rob Kennedy's SAMgrid meeting. GP presented his data collecting job; it was pointed out that the immediate need is to distill the current numbers, not collect archival numbers

I have started archiving documents in the CD-Docdb:  
CD-doc-2596 - compilation of these weekly status reports  
CD-doc-2597 - compilation of bi-weekly presentations  
CD-doc-2598 - GP's material for the Feb 7 presentation  
CD-doc-2604 - Draft of the writeup.

These documents are all tagged with the Keyword: RunIIResourceProject
