

Glidein WMS Support

Burt Holzman & Eileen Berman

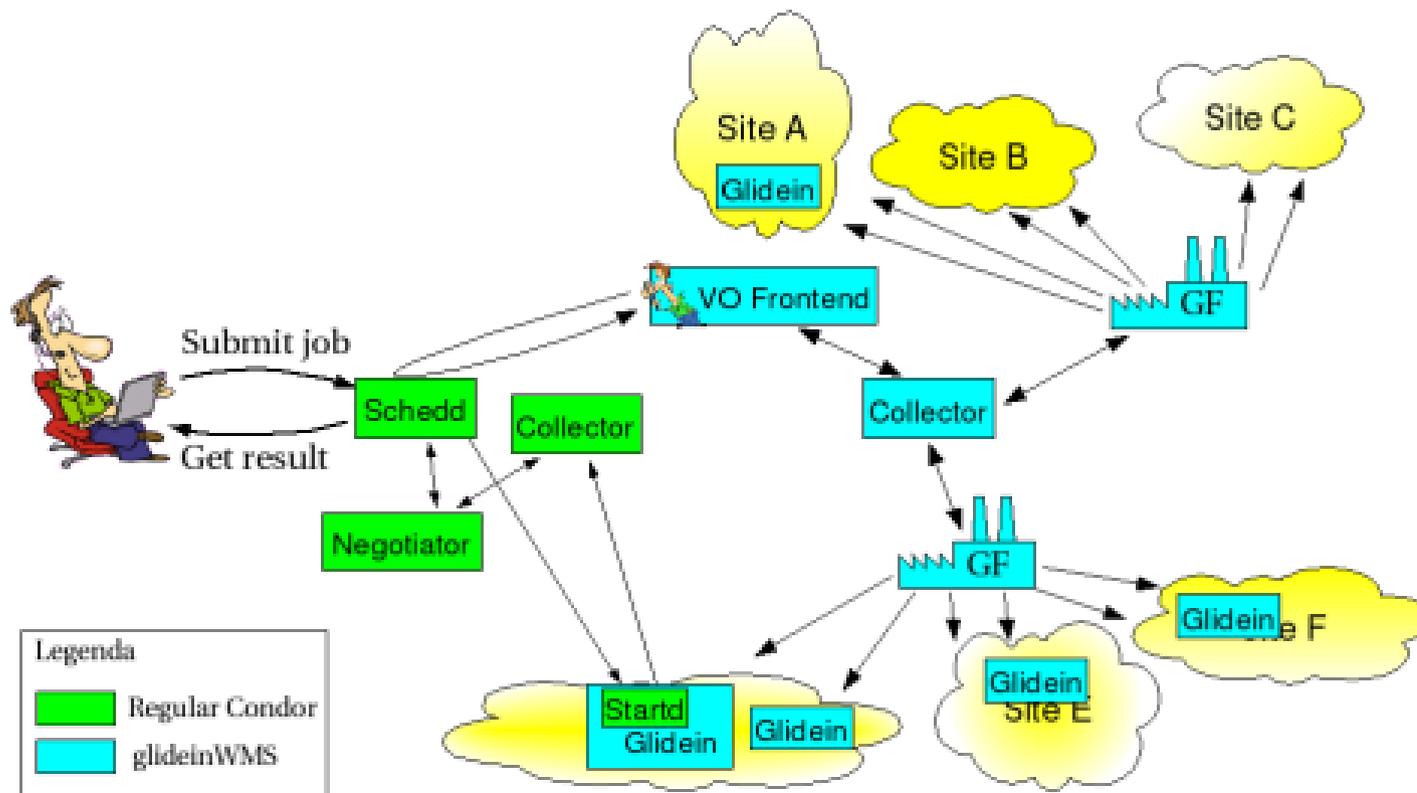

CD Briefing

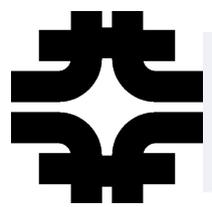

November 7, 2008

Glidein WMS

⇒ GlideinWMS: a workload management system for the grid centered around Condor's glide-in functionality

Glidein WMS

⇒ Stakeholders

⇒ CDF, D0, Fermigrid, MINOS, OSG, CMS

⇒ All stakeholders will be supported

⇒ Current Effort (FTEs) (1st - 2nd Quarter FY09)

⇒ 60% development (50% Sfiligoi – CMS, 10% Mhashilkar - CD)

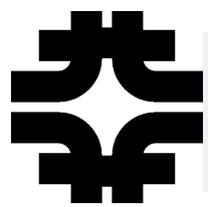

⇒ 5-10% project mgmt (Holzman - CMS)

⇒ Projected Effort (3rd - 4th Quarter FY09)

⇒ 15% operational support (Sfiligoi – CMS, Mhashilkar - CD)

⇒ 45% integration/hardening/devel. (Sfiligoi- CMS, Mhashilkar - CD)

⇒ 5-10% project mgmt (Holzman - CMS)

Glidein WMS Support

- ⇒ Two kinds of support
 - ⇒ “Operational”: triage and troubleshooting – expert help for product (currently: Sfiligoi + Mhashilkar)
 - ⇒ “Development”: new feature requests, bugs in architecture/design, etc. (currently: Sfiligoi + Mhashilkar)
- ⇒ Need for development support evolves as stakeholders ramp up and generate new requirements
 - ⇒ Effort TBD if needed
- ⇒ Requirements from last stakeholder meeting are consistent with current project requirements
